Emission reduction internship program - Proposals

Life Cycle Assessment study

Key activities:

LCA study regarding commercial technologies for biogas production from biomasses, with particular reference to FORSU (organic fraction municipal solid waste) and subsequent upgrading to biomethane.

Personnel specification (qualification, key skills, background)

Preferably a chemical Engineer or alternatively an environmental/energy engineer, with basic knowledge of process engineering and H&MBs and of Life Cycle Assessment studies (methods, scope and preferably use of LCA software).
